Step 6: Click "Next" after selecting "Yes, I'm in."

The screenshot shows a web browser window with the URL <https://accentureatp.udemy.com/organization/onboarding/>. The page header includes the UDEMY business logo and "Step 1 of 3". The main content area features the heading "Mastering a new skill takes time; let's keep your learning on track." followed by a subtext: "I'd like personalized learning recommendations, tips to accelerate my progress, and occasional reminders from UDEMY Business." Below this, there are two radio button options. The first option, "Yes! I'm in", is selected and circled in red. The second option is "No, thanks. I'll learn on my own". At the bottom of the page, there are two buttons: "Previous" on the left and "Next" on the right. The "Next" button is circled in red.

Everything you need to know about Visual Studio Code, the most popular editor in Web Development!

4.7 ★ 12,228 4 hours
3,095 ratings Students Total

Last updated February 2020

English English [Auto]

What you'll learn

- ✓ Time-saving tips on how to efficiently navigate Visual Studio Code
- ✓ Effectively debug JavaScript with Node, React, Angular, and Vue.
- ✓ Generate code faster and more efficiently
- ✓ Customize Visual Studio Code with shortcuts, themes, extensions, snippets, and more
- ✓ Integrate source control with Git/Github into Visual Studio Code

Description

This course has been completely re-recorded in 2020 to make sure you get the latest content!

In just a few years, Visual Studio Code has become the most popular editor for Web Development. In short, it is open-source, cross-platform, full of functionality, and has an amazing community behind it. Many of the biggest names in Web Development have already made the switch, and so should you! If you're looking to learn the ins and outs of VS Code while increasing your efficiency and proficiency as a developer, this course is perfect for you. Whether you're brand new to Web Development or a seasoned veteran, there's something for everyone.

Who this course is for:

- New web developers looking for the best tools.
- Experienced Web Developers looking to switch over to Visual Studio Code
- Web Developers looking to increase their speed and efficiency as a developer

★★★★★ a year ago

Course is well put together. It covers all the keyboard short cuts needed to use the editor efficiently. The best part of the course is the list of extensions to install to take advantage of the many aspects of Visual Studio Code. I now feel more confident of how to navigate my code within the editor and be more productive. You can clearly understand the instructor as he guides you right along each section.

Join Discord for Extra Support

Hey all,

A few months ago I created a [Discord Server](#) following my **Learn Build Teach** brand. The goal of this discord is to help facilitate the sharing and learning process with the community. It's also a great way to get support from a large group of supportive developers.

I want to encourage you to join the discord for a few different reasons.

- great place to meet and learn from other developers
- course-specific channels for support outside of Udemy
- great place to share the things you learn and content you create

I really think you will learn a lot if you join. Hope to see you there!

[Join The Discord Server](#)

Thanks,

James
